

Camp Invention®

Be a part of something big.

By hosting Camp Invention, you are partnering with the only nationally recognized, non-profit elementary enrichment program backed by the National Inventors Hall of Fame.

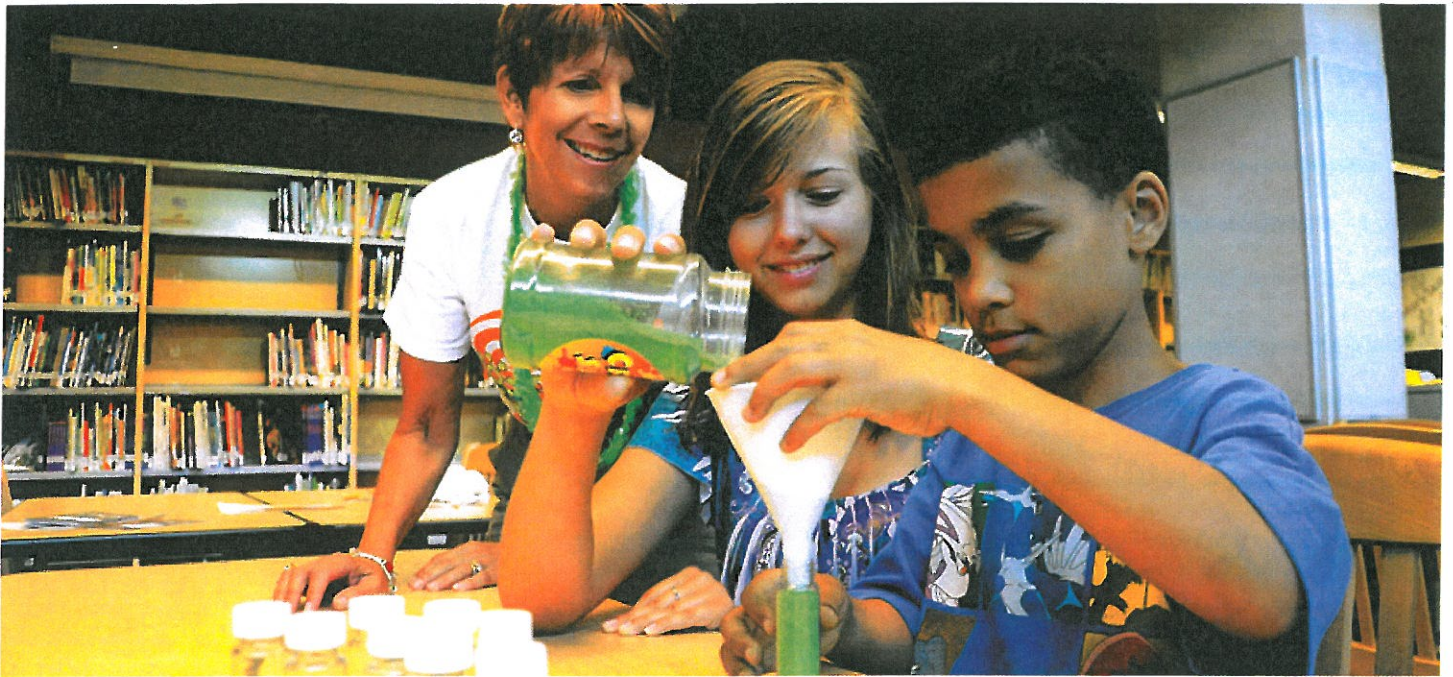

Working in teams, children are presented with real-world challenges that promote the direct application of critical-thinking and communication skills demanded by colleges, careers and citizenship in the 21st century.

Science, Technology, Engineering and Math (STEM) concepts are explored via hands-on, creative problem solving activities. Camp Invention inspires children to be curious about their world and prepares them for the future.

For first through sixth grades.

Based on the same guiding principles as Camp Invention, Club Invention Afterschool provides everything you need to foster creativity and explore science concepts in an afterschool setting.

Our programs are all-inclusive; we provide curricula, step-by-step instructions, full registration and promotional support, Instructor training and program materials to ensure a seamless and consistent delivery in any setting.

Camp Invention provides your teachers with direct experience in how to integrate STEM content with student-centered instructional strategies. Teachers are encouraged to use these strategies in their teaching in the classroom to enhance student learning.

Invention Project encourages middle school students to think big, be bold and never give up. Participants are challenged to create new, innovative designs, but they must also consider business, economics and marketing. They explore circuitry and robotics, kinetic energy, game mechanics and virtual worlds, wearable technology, adaptive innovation, industrial design, design engineering, spatial relationships and more. Invention Project activities reinforce the necessary skills for invention, as well as life.
